

MICKO MATAMOROSA

Software Engineer | Full-Stack Developer | Backend Developer
mickomatomorosa@gmail.com | 9272026288 | Albay, Philippines | <portfolio link>

Full-Stack Software Engineer (Backend-focused) with 6+ years building scalable, high-performance web applications. Expert in Node.js, React, Python, and PostgreSQL with hands-on experience in AI integrations, real-time systems, and AWS cloud infrastructure. AWS Certified Cloud Practitioner and Developer - Associate.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL

Frameworks and Libraries: React, Node.js, Redux, Recoil, Context API, TailwindCSS, MaterialUI, FastAPI

Databases (ORM): PostgreSQL (Prisma), MongoDB (Mongoose), MySQL (Prisma), Redis

Technologies: RESTful APIs, WebSockets, Socket.io

Cloud and DevOps: Amazon Web Services, Docker, CI/CD Pipelines, Vercel

Tools and Platforms: Git, VS Code, Claude Code, Jest, Cypress

AI Integrations: LLM API Integration, Prompt Engineering

PROFESSIONAL EXPERIENCE

Boom AI Solutions OPC

Sept 2020–Dec 2025

Software Engineer

- Designed and developed full-stack web applications using React, Node.js, and Python, delivering high-performance, scalable solutions for enterprise clients.
- Develop custom, CRM applications utilizing ReactJS for dynamic frontend and Node.js/Express.js for robust backends
- Built and maintained RESTful APIs using Node.js, Python, and AWS services (Lambda, API Gateway, RDS) to support scalable backend architectures.
- Engineered and optimized high-throughput SMS communication systems designed for concurrent customer engagement.
- Created advanced Python and Node.js automation scripts to streamline distributed workflows and large-scale data processing.
- Collaborated with cross-functional teams to integrate complex AI/LLM capabilities and analytics pipelines into backend services.
- Contributed to an internal CRM system development, streamlining business processes and improving internal workflows.
- Improved WordPress project performance by optimizing database queries and refactoring code logic, reducing page load times and enhancing data filtering accuracy.
- Collaborated with cross-functional teams in an agile environment to deliver features on time and to specification.

Boomsourcing INC

May 2019–Mar 2022

Junior Web Developer

- Completed intensive BoomCamp Training focusing on full-stack engineering with JavaScript and Python
- Gained hands-on experience in full-stack feature development, external API integration, and modern software design patterns

CERTIFICATIONS

- AWS Certified Developer - Associate
- AWS Certified Cloud Practitioner
- Boom.Camp Full-Stack Engineering Certificate

EDUCATION

Bachelor of Science in Information Technology

Forbes College, Philippines
